Government of Madhya Pradesh (GoMP) envisions providing good governance by establishing an Accountable, Committed, Transparent, Responsive, Inspiring and Reliable governance. The e-Procurement is one of such vehicles that are being gainfully used in achieving the goal of good governance. The e-Procurement project is identified as integrated Mission Mode Project (MMP) under National e-Governance Plan (NeGP).

GoMP is successfully operating this e-Tendering project in the state since September 2006. The selection of the agency for implementation of e-Tendering was through Public Private Partnership (PPP) mode. It is envisaged to be implemented in all the line departments at No-Cost to Government, Bidders choosing to participate in the tender are required to pay the service charges.

Project Overview

The e-Procurement system provides the unified end to end platform which covers public procurement and disposal of government/public assets and captures the entire procurement life cycle including pre-tendering, e-tendering and post tendering activities.

Objectives

- Reduce the time and cost of doing business for both vendors and government
- Achieve better value for money spent through increased competition and the prevention of cartel formation
- Standardize the procurement processes across government departments/agencies
- Increase buying power through demand aggregation
- Allow equal opportunity to all vendors
- Bringing Transparency

Key Features

- Centralized Supplier Management System
- e-Tendering
- e-Auction
- e-Payments
- Management Information System
- Contract Management
- Catalogue Management
- Indenting Management
- Help Desk
Background
The training of the MP e-Procurement System is available free of cost to each user of the system which includes officials form the department and registered vendors.
